

“There is no place like home” - for dysphagia therapy

Horizon Home Health & Hospice is pleased to announce VitalStim Therapy for Dysphagia. VitalStim therapy uses small electrical currents to stimulate the muscles responsible for swallowing. At the same time, a VitalStim trained speech-language pathologist helps patients re-educate their muscles through rehabilitation therapy. This painless therapy is safe and proven to be effective for a variety of patients. If your patient has dysphagia, he/she may be a candidate for VitalStim therapy. Call Today for more information. Please ask for David Langenfeld, RN.

Candidates for VitalStim Swallow Therapy:

- Feeding Tube
- Modified Consistency Diet
- History of Pneumonia
- Drooling
- Aspiration
- Certain Disease/Disorders: Stroke, Parkinson's, Traumatic Brain Injury, ALS, MS, Mouth/Throat Cancer, Cerebral Palsy, other degenerative and neurological conditions.
